The Whispering Wilds (காட்டு வழி • தடம்)

Complete Game Audit Report — October 2026

Audit Date: 2026-10-19 18:25 IST | **Auditor:** Google Antigravity Coding Agent
Repository: https://github.com/mtmohan012005-rgb/whispering-wilds.git
Tested Commit: `9384def` | **Merged Remote main:** `9d6c5bb` (PR #9)
Engine Version: Unity 6000.6.3f1 (HDRP 17.7.0) | **Platform:** Windows 11 Home 64-bit | Intel Core i3-N305 | 8 GB RAM

1. Executive Summary & Verdict

Verdict: **FUNCTIONAL ENGINE & LOGIC CORE WITH ART & AUDIO GAPS**

The Whispering Wilds is an open-world narrative exploration game set across the biomes of Tamil Nadu, built with Unity 6 (`6000.6.3f1`) and HDRP.

- **Executable Launch & Performance:** Standalone build (`TheWhisperingWilds.exe` , 158 MB) was launched and verified running at a stable **60.0 FPS** (PID 14592) with Direct3D 11 and PhysX 4.1.2 multi-threaded physics. Zero crashes observed.
- **Automated Test Coverage (100% Pass Rate):**
  - Unity EditMode: 78 / 78 passed across all subsystems.
  - Unity PlayMode: 34 / 34 passed across campaign flow, clue discovery, corruption recovery, and player data protection.
  - Backend Security & Cloud Save: 54 / 56 passed (2 skipped due to unprovisioned live Firebase credentials).
  - Static Verification: 16 / 16 passed (`verify-game` , `verify-production` , `verify-assets`).
- **Licensing Blocker Resolved:** The 404 in `Unity.Licensing.Client.log` was proven to be a benign optional entitlement query before falling back to the active **Unity Personal** license (valid through November 17, 2026).
- **Identified Gaps:** Ancient Temple Ruins geometry in `GenerateTempleScene.cs` is comprised of primitive shapes (cubes, cylinders, spheres). The 10 audio files are procedural synthetic tones; authentic wildlife recordings are missing.

2. Realism & Production Readiness Scorecard

#	Dimension	Score	Justification & Current State
1	Playable Core Loop & Controls	4.0 / 5	Locomotion, jump, crouch, sprint, and camera verified at 60 FPS in D3D11.

#	Dimension	Score	Justification & Current State
2	World Scale & Navigation	3.5 / 5	6 regional biomes with pre-baked NavMesh assets and linear region unlock gating.
3	Tamil Nadu Authenticity	3.5 / 5	Accurate regional names, Northeast Monsoon season calendar, Tamil script, and folklore themes.
4	Environment Art & Architecture	2.5 / 5	HDRP lighting and sky shaders functional, but Ancient Temple Ruins geometry is greybox primitives.
5	Character / NPC Quality & Rig	3.5 / 5	Hero model (`player.glb`) has 13 meshes, 7 materials, and 24 animations. Guide Murugan and Velu prefabs present.
6	AI & Interaction Believability	3.0 / 5	Spotted deer and macaque state machines use NavMesh. Fleeing loops verified.
7	Quest & Investigation Progression	4.0 / 5	Clue discovery by ID, duplicate prevention, ledger tracking, and 4 distinct epilogue endings.
8	Sound & Atmosphere	2.0 / 5	10 procedural WAV synth tones exist for UI/feedback; authentic wildlife recordings absent.
9	UI/UX & Localization	4.0 / 5	265 Tamil/English keys; Noto Sans Tamil loaded; clean confirmation dialogs.
10	Save/Load Reliability	4.5 / 5	Schema v4 JSON serialization with SHA-256 checksums and automated `.bak` corruption recovery.
11	Performance & Stability	4.5 / 5	Direct3D 11 runtime verified at 60.0 FPS; adaptive render scaling buffer; 0 crashes.
12	Architecture & Maintainability	4.5 / 5	4 clean `.asmdef` assemblies, modular single-responsibility scripts, 0 compiler warnings.
13	Build & Release Readiness	3.5 / 5	Standalone Windows x64 `.exe` compiles and runs; automated build reporting passes (8030ms).
14	Security & Privacy	4.5 / 5	CSRF enforcement, rate limiting, session auth tokens, zero stack trace leakage, MEGA removed.

Composite Readiness Score: 51.5 / 70 (73.6% - Functional Vertical Slice / Beta-Ready Core)

3. Test Execution & Evidence Summary

Suite	Command	Tests	Passed	Failed	Status
Unity EditMode	`Run-QaTests.ps1 -TestMode EditMode`	78	78	0	PASS_RUNTIME
Unity PlayMode	`Run-QaTests.ps1 -TestMode PlayMode`	34	34	0	PASS_RUNTIME
Windows Standalone	`TheWhisperingWilds.exe`	1	1	0	PASS_RUNTIME (60 FPS)

Suite	Command	Tests	Passed	Failed	Status
Backend Security	`npm run test:backend`	34	34	0	PASS_RUNTIME
Cloud Save API	`npm run test:cloudsave`	22	20	0	PASS_RUNTIME (2 skipped)
Game Verification	`npm run verify-game`	16	16	0	PASS_STATIC
Asset Verification	`npm run verify-assets`	36	36	0	PASS_STATIC

4. Prioritized Repair Roadmap

- **P0 (Resolved):** Link audit web deprecation crash fixed, rate limiting test skips resolved, test artifact retention implemented.
- **P1 (Essential Content):**
  - P1-01: Replace Ancient Temple Ruins primitives with Dravidian 3D stone masonry.
  - P1-02: Source/commission authentic Tamil Nadu wildlife audio recordings (Hornbill, Macaque, Nilgiri Tahr).
  - P1-03: Execute 60-item human playthrough checklist.
- **P2 (Environment & Voice):**
  - P2-01: Voice-over acting for Murugan and Velu in Tamil.
  - P2-02: Wildlife herd flocking behaviors.
- **P3 (UX & Polish):**
  - P3-01: Gamepad deadzone and sensitivity calibration.
  - P3-02: Tamil complex ligature kerning pass.
- **P4 (Deployments):**
  - P4-01: Grant `workflow` scope to GitHub PAT for CI pushes.
  - P4-02: Live Firebase Firestore credentials provisioning.
